API Overview

SampleCopy API – The Concept

Welcome to the swapi, the SampleCopy API.

This documentation helps you familiarize yourself with the resources available and how to consume them with HTTP requests.

The main resource detailed in the API is “people”. A People resource is an individual person or character within the Sample Copy universe.

Workflow

{the workflow diagram}

Authentication / Authorization

Swapi is a completely open API. No authentication is required to use it. However, it is limited to the GET method. If you find a mistake in the data, you can tweet to the person supporting the site.

Headers

Content-Type: application / json

accept: application / json

Return Status Codes

Parameter	Description
200	OK
404	NOT FOUND

Rate Limits

Swapi has rate limiting to prevent malicious abuse (as if anyone would abuse Sample Copy data!) and to make sure our service can handle a potentially large amount of traffic. Rate limiting is done via IP address and is currently limited to 10,000 API request per day. This is enough to request all the data on the website at least ten times over. There should be no reason for hitting the rate limit

API References

Find All People

Introduction

API for fetching the details of a single pet from the pet store database.

This API is for fetching all the people resources.

Resource

People

Method

GET

Base URL

<https://swapi.py4e.com/api>

Endpoint / Request URL

<https://swapi.py4e.com/api/people>

Response Parameters

Parameter	Data Type	Values	Description
name	string		The name of the person.
height	string		The height of the person in centimeters.
mass	string		The mass of the person in kilograms.
hair_color	string		The hair color of the person. Will be "unknown" if hair color not known or "n/a" if the person does not have hair.
skin_color	string		The skin color of the person.
eye_color	string		The eye color of the person. Will be "unknown" if the eye color is not known or "n/a" if the person does not have an eye.
birth_year	string		The birth year of the person. Using the in-universe standard of Before the Battle of Yavin (BBY) or After the Battle of Yavin (ABY). The Battle of Yavin is a battle that occurs at the end of Sample Copy episode IV: A New Hope.
gender	string	• Male • Female • n/a	The gender of the person. Either "Male", "Female" or "unknown", "n/a" if the person does not have a gender.
homeworld	string		The URL of a planet resource, a planet that the person was born on or inhabits.
films	array		An array of film resource URLs that the person has been in.
species	array		An array of species resource URLs that the person belongs to.
vehicles	array		An array of vehicle resource URLs that this person has piloted.
starships	array		An array of starship resource URLs that this person has piloted.
created	string		The ISO 8601 date format of the time that the resource was created.
edited	string		The ISO 8601 date format of the time that the resource was edited.
url	string		The hypermedia URL of the resource.

Sample Response Body

```

```

Find People By id

Introduction

This API is for fetching the details of a person from the Sample Copy universe filtering by id.

Resource

people

Method

GET

Base URL

<https://swapi.py4e.com/api>

Endpoint / Request URL

<https://swapi.py4e.com/api/people/{id}>

Example: <https://swapi.py4e.com/api/people/1>

Path Parameters

Parameter	Required / Optional	Data Type	Values	Description
id	Required	String		The unique id for the person

Response Parameters

Parameter	Data Type	Values	Description
name	string		The name of the person.
height	string		The height of the person in centimeters.
mass	string		The mass of the person in kilograms.
hair_color	string		The hair color of the person. Will be "unknown" if hair color not known or "n/a" if the person does not have hair.
skin_color	string		The skin color of the person.
eye_color	string		The eye color of the person. Will be "unknown" if the eye color is not known or "n/a" if the person does not have an eye.
birth_year	string		The birth year of the person. Using the in-universe standard of Before the Battle of Yavin (BBY) or After the Battle of Yavin (ABY). The Battle of Yavin is a battle that occurs at the end of Sample Copy episode IV: A New Hope.
gender	string	- Male - Female - n/a	The gender of the person. Either "Male", "Female" or "unknown", "n/a" if the person does not have a gender.
homeworld	string		The URL of a planet resource, a planet that the person was born on or inhabits.
films	array		An array of film resource URLs that the person has been in.
species	array		An array of species resource URLs that the person belongs to.
vehicles	array		An array of vehicle resource URLs that this person has piloted.
starships	array		An array of starship resource URLs that this person has piloted.
created	string		The ISO 8601 date format of the time that the resource was created.
edited	string		The ISO 8601 date format of the time that the resource was edited.
url	string		The hypermedia URL of the resource.
